| M. Torabi | 1 | Decomposed block Cholesky factorization in the Karmarkar algorithm. Solving a class of super large LP problems |

V. Pan and J. Reif	9	The bit-complexity of discrete solutions of partial differential equations: compact multigrid
V. Pan	17	Estimating the extremal eigenvalues of a symmetric matrix
N. Ghosh and W. W. Hager	23	A derivative-free bracketing scheme for univariate minimization
C.-A. Wang, T.-W. Hwang and Y.-Y. Chen	35	Existence of solutions for Berman's equation from laminar flows in a porous channel with suction
W. V. Gehrlein and P. C. Fishburn	41	Linear extension majority cycles for small ($n \leq 9$) partial orders
A. van Nieuwkerk and F. D. van Nieuwkerk	45	A Galerkin method with rational basis functions for Burgers equation
R. Kalaba and L. Tesfatsion	53	Nonlocal automated sensitivity analysis
I. A. Krass	67	Shadow method for convex programming with application for Navy credit Sea/Shore rotation problem
	81	Book Reports
	I	<i>Software Survey Section</i>

NUMBER 3

	iii	Softstrip® data strip containing the table of contents of this issue
V. Pan	1	The modified barrier function method for linear programming and its extensions
P. Bogacki and L. F. Shampine	15	Interpolating high-order Runge-Kutta formulas
M. Mahmoudi	25	Particle modelling of fluid phenomena in 3-D
P. Glialster	45	Flux-difference splitting for inviscid, real gases with non-equilibrium chemistry
I. J. D. Craig and A. D. Sneyd	53	An alternating direction implicit scheme for parabolic systems of partial differential equations
B. J. Arnow	63	Representation of permutations, combinations and dihedral elements as trees
R. J. Cimikowski	69	Coloring certain proximity graphs

NUMBER 4-6
MATHEMATICAL MODELS IN MEDICINE
VOLUME 4

	ix	About this issue
	xi	Author's guidelines
M. Witten	xiii	Mathematical modeling and computers in medicine: Editor's remarks
L. F. Harris, M. R. Sullivan and D. F. Hickok	1	Conservation of genetic information between regulatory protein DNA binding alpha helices and their cognate operator sites: a simple code for site-specific recognition
L. F. Harris, M. R. Sullivan and D. F. Hickok	25	Genetic sequences of hormone response elements share similarity with predicted alpha helices within DNA binding domains of steroid receptor proteins: a basis for site- specific recognition
S. Le, R. Nussinov and J. V. Maizel Jr	49	Studies of local stability in histone, U-snRNA and globin precursor mRNAs around transcription termination sites
J. L. Carrascosa, J. M^a Carazo, L. Herranz, L. E. Donate and J. P. Secilla	57	Study of two related configurations of the neck of bacterio- phage Ø29
A. Boudiaf, Y. Cherruault, and R. Belle	67	Modelling and optimization of meiotic cell division of Xenopus oocytes
S. Guellal, C. J. Papapanayotou, Y. Cherruault and J. Sainte-Laudy	73	A mathematical model of the allergen-triggered human basophil receptivity
P. Auger	79	Cell lifetime and chemical kinetics
R. L. Selther, D. Hearne, D. Trent, D. C. Mikulecky and I. D. Goldman	87	SPICE2 network thermodynamic simulation of antifolate effects on purine and pyrimidine biosynthesis: exploring the role of tetrahydrofolate cofactor depletion versus dihydro- folate feedback inhibition
D. Buckwitz, G. Jacobasch and H.-G. Holzhütter	103	A kinetic model of phosphofructokinase from <i>Plasmodium berghei</i> —application of a novel procedure for model dis- crimination

W. M. L. Holcombe	107	Towards a formal description of intracellular biochemical organization
D. Buckwitz and H.-G. Holzhütter	117	A new method to discriminate between enzyme-kinetic models
I. Györi	127	Some mathematical aspects of modelling cell population dynamics
S. Michelson	139	A system for Monte Carlo simulation of heterogeneous tumor cell populations
S. Michelson and J. T. Leith	149	Effects of differential cell kill on the dynamic composition of heterogeneous tumors
E. O. Voit	161	S-System modelling of endemic infections
Y.-H. Xu and E. P. Salathe	175	Boundary value problems in microcirculatory physiology
C. J. Papapanayotou, Y. Cherruault and B. de la Rochefoucauld	199	A mathematical model of the circle of Willis in the presence of an arteriovenous anomaly
R. L. Ollerton	207	A discrete segments approach to the optimization of insulin infusion algorithms
R. Martin	217	Single-interval learning by simile within a simulated Hebbian neural network
S. Tauber	227	A systemic model for nerve transmission and memory
D. Krieger, T. W. Berger, S. Levitan and R. J. Sclabassi	231	An interactive toolset for characterizing complex neural systems
H. B. Sieburg	247	The cellular device machine: point of departure for large-scale simulations of complex biological systems
A. T. Pol	269	Life: energy-information relationship within material systems—I. General outline of the concept
C. Schwabe	287	Evolution and chaos. The genomic potential hypothesis and phase-state mathematics
W. B. Dress	303	Electronic life and synthetic intelligent systems
V. K. Sondak and N. E. Sondak	313	New directions for medical artificial intelligence
S. Tauber	321	A chemical robot model
Y. Shraga and R. P. Tewarson	325	Parameter estimation in underdetermined problems
<i>Book Reviews</i>	339	Neural and Brain Modeling. By Ronald J. MacGregor
	339	Fractals Everywhere. By Michael Barnsley
	339	Input Devices. Edited by Sol Sherr

APPLICATIONS OF LOGIC PROGRAMMING IN DECISION AND CONTROL

Y. Lirov	vii	Preface
T. Huynh and C. Lassez	1	An expert decision-support system for option-based investment strategies
E. Y. Rodin and D. Geist	15	Flight and fire control with logic programming
G. E. Kersten, S. Szpakowicz and Z. Koperczak	29	Modelling of decision making for discrete processes in dynamic environments
T. Graf, P. Van Hentenryck, C. Pradelles-Lasserre and L. Zimmer	45	Simulation of hybrid circuits in constraint logic programming
G. Friedrich, G. Gottlob and W. Nejdl	57	Generating efficient diagnostic procedures from model-based knowledge using logic programming techniques
B. Jayaraman	73	Subset-equational programming in intelligent decision systems
A. Bonsignori, F. Giannotti, L. Lucchesi and F. Turini	83	The Logiform system
M. J. Pazzani	101	Learning in order to avoid search in logic programming
Y. Lirov and S. Ravikumar	111	Intelligent interaction in diagnostic expert systems

- | | | |
